Abstract

The Online Art Gallery Management System is a web-based platform that connects artists with art buyers through digital commerce. Artists can register, upload their artwork, set prices, and track their sales, while users can browse collections, purchase artwork, and manage their orders. The system includes an admin panel for managing artists, approving artworks, and monitoring all platform activities.

Built using ASP.NET Web Forms and SQL Server, the system provides secure authentication, shopping cart functionality, order processing, and sales reporting. It features three user roles with distinct dashboards and capabilities. Testing confirms all modules work correctly and the system provides a smooth experience for artists selling their work and users purchasing art online.

Introduction to Project

The Online Art Gallery Management System is a complete web application that allows artists to showcase and sell their artwork online while providing art enthusiasts with an easy platform to discover and purchase art. Artists can create profiles, upload their creations with descriptions and pricing, view their sales performance, and manage customer inquiries. Regular users can browse through different categories of artwork, add items to their cart, complete purchases, and track their order history.

The system is divided into three main roles with separate interfaces. Artists get a personalized dashboard to manage their portfolio and sales. Users have access to browse artwork, make purchases, and view their orders. Administrators control the entire platform by verifying artists, approving artwork submissions, managing users, and generating comprehensive sales reports. The project uses ASP.NET Web Forms for the frontend and backend, with SQL Server handling all data storage and retrieval operations.

Problem Statement

- Artists lack a proper platform to showcase and sell their artwork.
- Traditional galleries have high commissions and limited display space.
- Art buyers struggle to discover diverse artwork and connect with artists.
- Existing online platforms lack verification, good portfolio management, and charge high fees.
- A centralized system is needed with secure payments, portfolio management, and admin verification tools.

Objectives and Scope

Objectives

1. Create a platform where artists can register, get verified, and upload their artwork with complete details.
2. Provide users with an easy browsing experience to discover artwork by categories and make secure purchases.
3. Implement a shopping cart and order management system for smooth transactions.
4. Build an admin panel to verify artists, approve artworks, and monitor all platform activities.
5. Generate sales reports for artists and administrators to track performance and revenue.

Scope

1. Artists can create profiles, upload unlimited artwork with images, descriptions, and pricing information.
2. Users can browse categorized artwork, add items to cart, checkout, and view their complete order history.
3. The system includes secure login authentication for all three user roles with role-based access control.
4. Admin can approve or reject artist registrations, manage artwork submissions, and view comprehensive sales analytics.
5. The platform maintains detailed records of all transactions including buyer information, artwork details, and payment status.
6. Future expansion can include online payment gateway integration, artist rating systems, artwork auctions, and mobile application development.

Literature Review / Existing System

Literature Review

Most artists today rely on social media platforms like Instagram and Facebook to showcase their work, but these platforms don't provide proper e-commerce features or sales management tools. Existing art marketplace websites often charge high commission fees ranging from 20% to 40% on each sale, which significantly reduces artist earnings. Some platforms focus only on established artists and require lengthy approval processes, making it hard for new artists to enter the market.

Current online art galleries either provide basic listing services without proper portfolio management or they offer complex enterprise solutions that are too expensive for individual artists. Many platforms lack proper admin controls to verify artist authenticity, leading to copyright issues and fake artwork listings. There's also a gap in providing artists with detailed sales analytics and customer management tools. No comprehensive solution exists that combines artist verification, portfolio management, e-commerce functionality, and sales reporting in one affordable platform.

Limitations of Existing System

1. High commission fees discourage artists from using online platforms for selling their work.
2. No proper artist verification system leads to fake profiles and copyright infringement issues.
3. Lack of integrated shopping cart and order management makes the buying process complicated for users.
4. Artists don't get detailed sales reports or insights about their artwork performance and customer preferences.
5. Most platforms don't provide admin tools to monitor and control platform activities effectively.

Proposed System

The proposed Online Art Gallery Management System provides a complete solution by combining artist portfolio management with e-commerce functionality in a single platform. Artists can register and get verified by administrators before uploading their artwork. The system allows artists to manage their complete portfolio, set prices, update artwork details, and view comprehensive sales reports showing which pieces are popular and generating revenue.

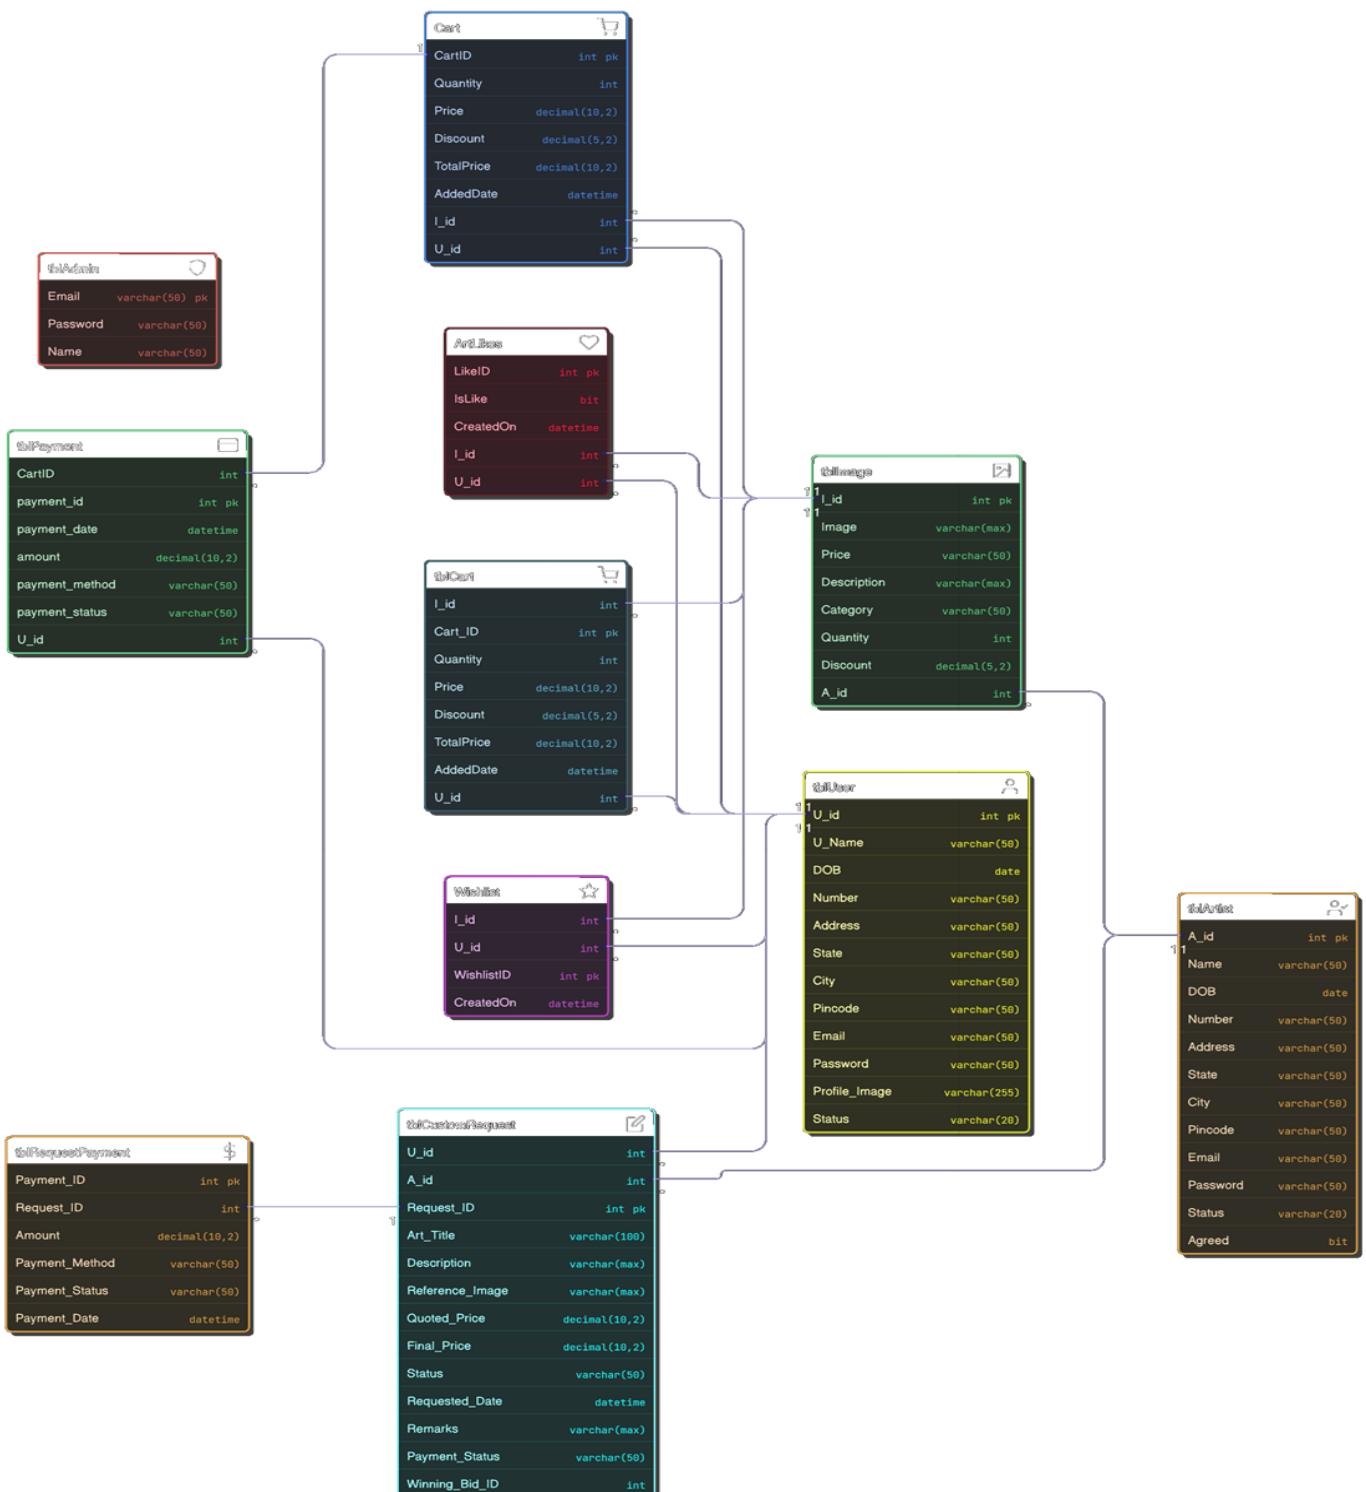

Users get a clean browsing interface to discover artwork organized by categories, with detailed views showing artist information, artwork descriptions, and pricing. The integrated shopping cart allows users to add multiple items and complete purchases through a streamlined checkout process. Administrators have full control over the platform with dashboards showing all registered artists, uploaded artwork pending approval, completed sales transactions, and revenue analytics.

Advantages of Proposed System

1. Single platform solution that handles artist registration, portfolio management, e-commerce, and sales reporting.
2. Admin verification ensures only authentic artists can sell artwork, maintaining platform quality and user trust.
3. Integrated shopping cart and order management provide smooth purchasing experience for buyers.
4. Detailed sales reports help artists understand their performance and make informed decisions about pricing and artwork styles.
5. Role-based access control ensures security with separate interfaces for artists, users, and administrators.
6. Low operational costs allow the platform to charge minimal or no commission, benefiting artists directly.

Online Art Gallery Platform Overview

1. Welcome to Our Art Gallery

The Home page introduces users to a vibrant digital art space that showcases a variety of stunning artwork. It highlights the platform's key features such as digital inventory, image search, and a defaulter list for safety. Beautiful sample paintings displayed at the top create a warm, gallery-like experience. Visitors can easily navigate to sign up, log in, or explore more sections of the platform.

2. About Our Online Art Community

The About Us page explains the mission of connecting talented artists with art lovers worldwide. It describes how users can browse, upload, and purchase artwork from the comfort of their home. The page outlines the simple working process of the platform: upload art, browse art, and buy art. A dedicated "Meet Our Team" section introduces the people behind the platform. It ends with an invitation for artists and users to join the growing creative community.

3. Meet Our Creative Team

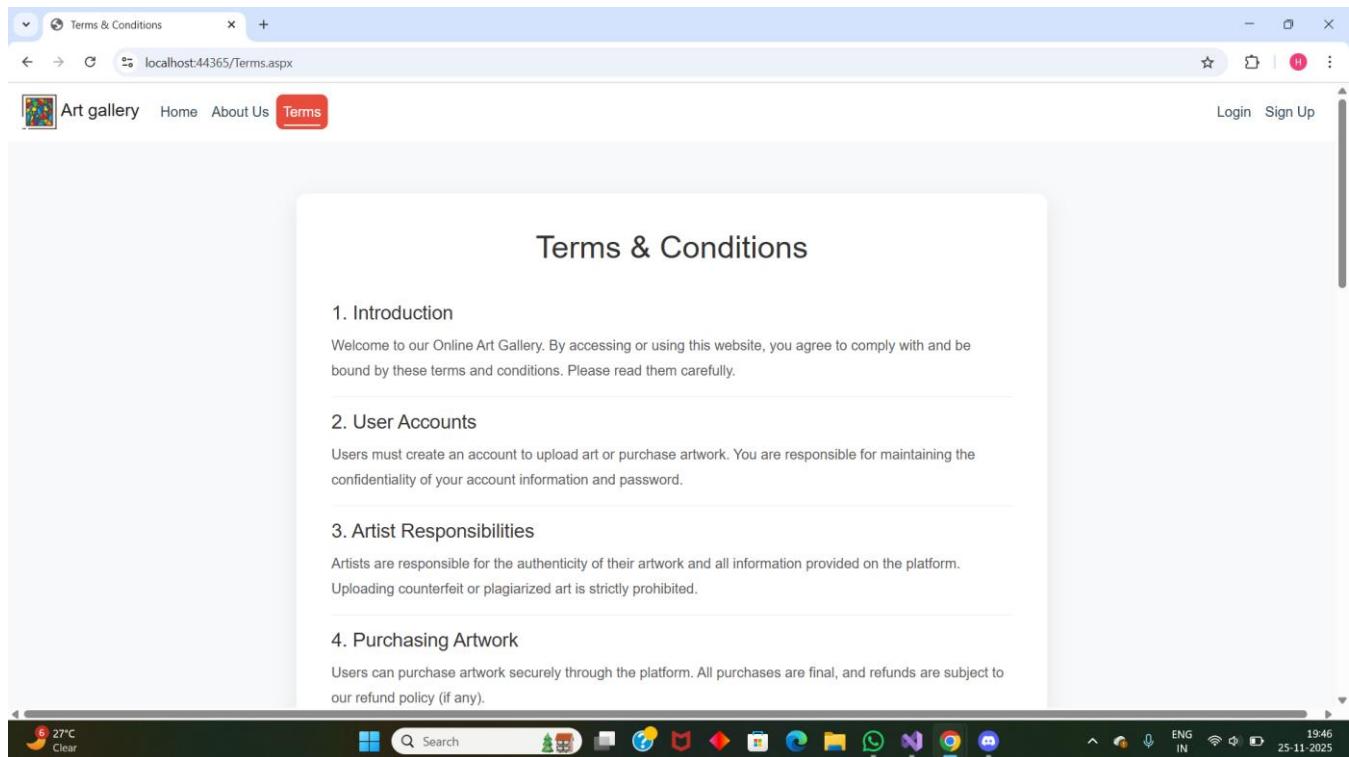

The screenshot shows a web browser window titled "About Us" with the URL "localhost:44365/AboutUs.aspx". The main content is titled "Meet Our Team" and displays four team members in cards:

- Harsh Gilitwala & Dev Jariwala**
Founder & Developer - Oversees the platform and ensures smooth functionality.
- Priya Sharma**
Art Curator - Curates artworks and manages artist portfolios.
- Rohan Mehta**
Marketing Head - Handles promotions, outreach, and customer engagement.
- Ayesha Sharma**
Customer Support - Assists users and artists with queries and support.

Below this, there's a section titled "Want to Join Us?" with a "Sign Up / Login" button. The browser taskbar at the bottom shows various pinned icons and the date/time "25-11-2025 19:46".

This page highlights the core members who run and manage the art gallery platform. It features founders, curators, marketing leads, and support representatives who contribute to the project. Their roles are clearly described, showing their involvement in curation, management, and user support. The layout is clean and modern, helping users connect with the people behind the platform. It reinforces trust by showing transparency and dedication in building the community.

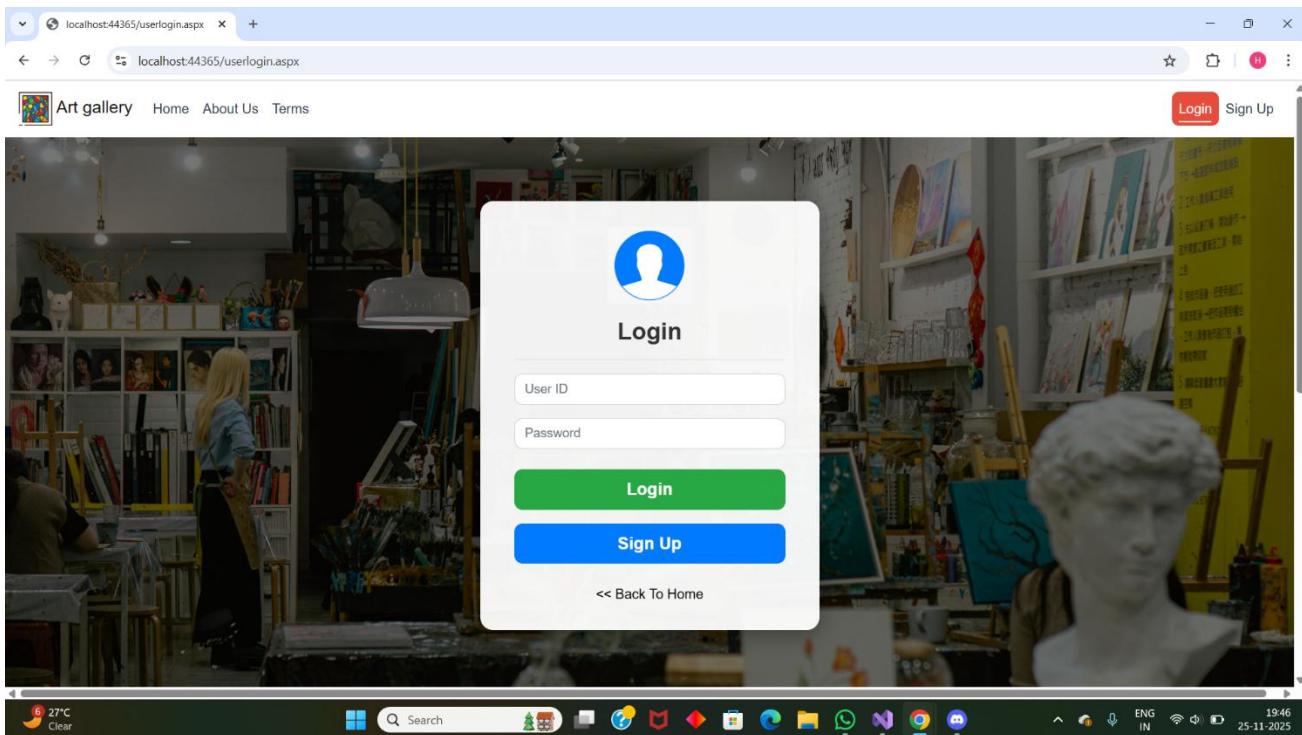

4. Terms and Conditions of Use

The Terms & Conditions page outlines the rules for using the online art gallery platform. It covers key topics such as account creation, artist responsibilities, and purchasing artwork. Users are reminded to protect their login details and upload only authentic, original art. Clear guidelines help maintain transparency, trust, and safety for all participants.

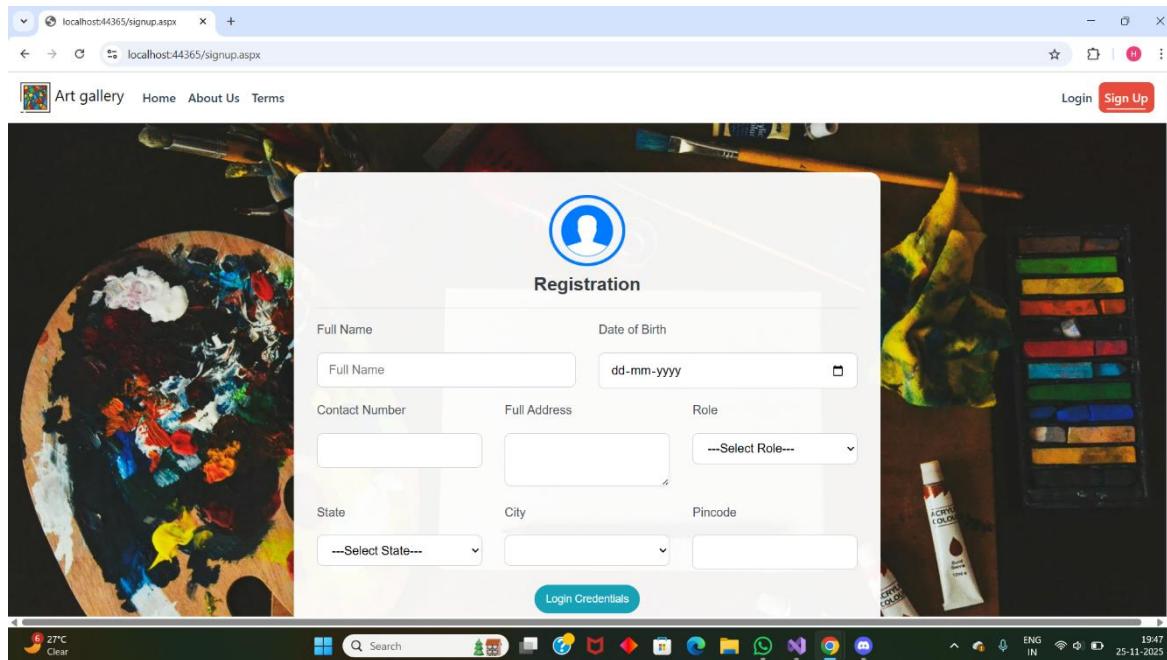

UserSide:

5. User Login Interface

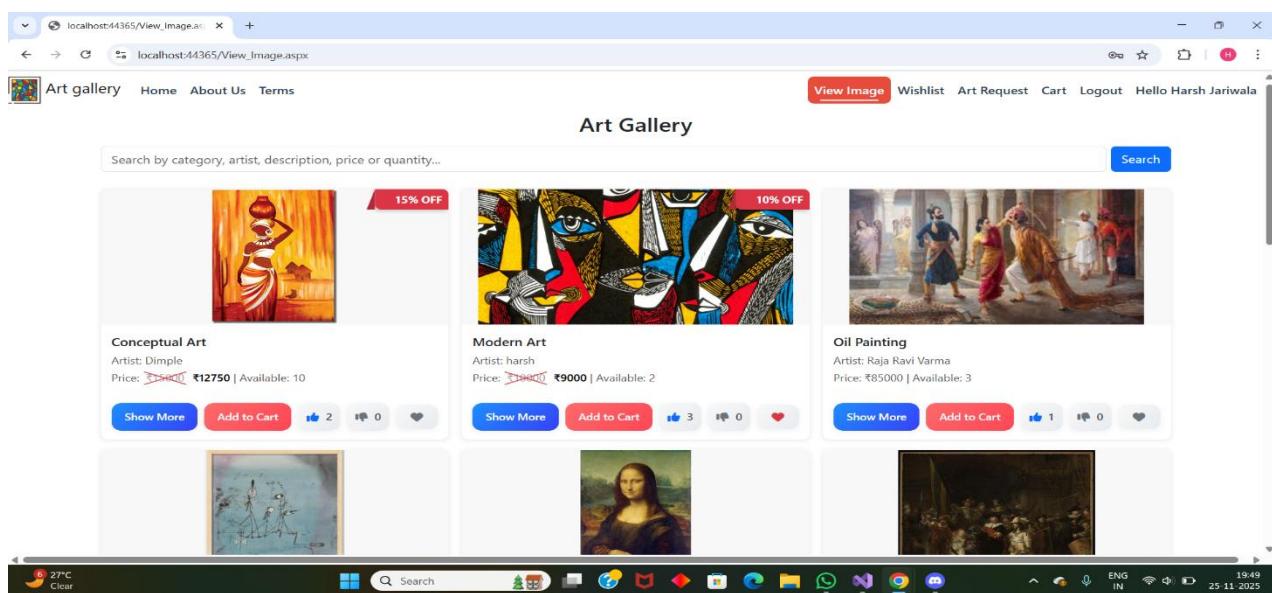

This login page features a clean and modern design centered over a blurred art-studio background, creating a visually appealing user experience. The form includes fields for User ID and Password, along with clear Login and Sign-Up buttons for easy navigation. A circular user-profile icon enhances the UI, while the top navigation bar provides quick access to Home, About Us, and Terms pages. The overall layout is simple, user-friendly, and professional.

6. User Registration Interface

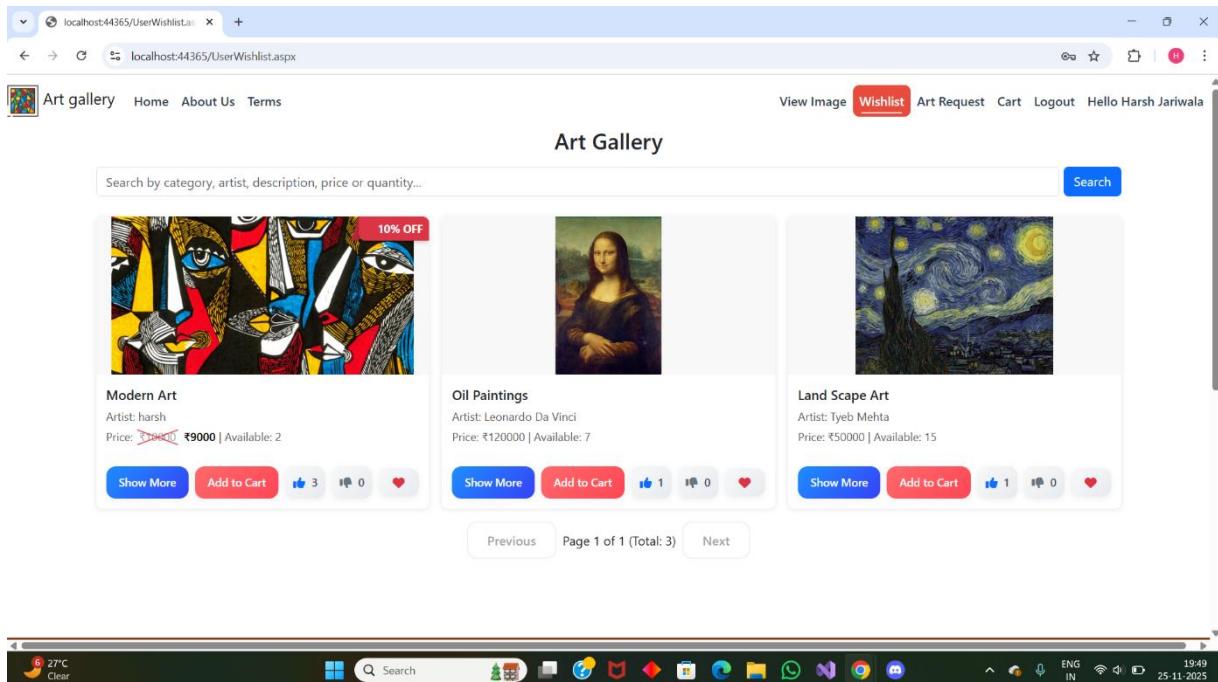

The registration page presents a clean and centered card layout over a vibrant art-themed background, creating a professional and creative visual appeal. Users can enter key details such as Full Name, Date of Birth, Contact Number, Address, and select their Role, State, City, and Pincode. A simple icon header reinforces the user profile theme, while the top navigation bar provides quick access to Home, About Us, and Terms pages. The overall design is modern, responsive, and optimized for user-friendly onboarding.

7. Artwork Listing & Shopping Interface

This page displays a modern and user-friendly artwork gallery where users can browse paintings by category, artist, description, price, or quantity through an integrated search bar. Each artwork card highlights the image, title, artist name, discounted price, availability count, and promotional offers like “10% OFF” or “15% OFF.” Users can quickly interact with artworks using buttons such as **Show More**, **Add to Cart**, **Like**, and **Wishlist**. The top navigation menu provides access to key features including Wishlist, Art Request, Cart, and user account options. The layout is clean, responsive, and visually appealing, offering a seamless shopping experience for art buyers.

8. Art Gallery Wishlist Page

The image shows a clean and modern art gallery website displaying three artworks—modern abstract art, a classic oil painting, and a night landscape. Each card includes details like the artist, price, availability, and options to view more or add to the cart.

9. Custom Art Request Dashboard

The screenshot shows a web browser window with the URL localhost:44365/UserRequestArt.aspx. The page has a header with links for 'Art gallery', 'Home', 'About Us', 'Terms', 'View Image', 'Wishlist', 'Art Request' (which is highlighted in red), 'Cart', 'Logout', and a greeting 'Hello Harsh Jariwala'. Below the header, there are two main sections: 'Request Custom Art' on the left and 'My Requests' on the right.

Request Custom Art: This section contains fields for 'Art Title' (with placeholder 'Enter art title'), 'Description' (with placeholder 'Describe your art idea'), 'Select Artist (optional)' (a dropdown menu showing '-- Select Artist --'), and an 'Upload Reference Image' field with a 'Choose File' button.

My Requests: This section lists a single request titled 'Harmony of Faces'. It includes a thumbnail image of a colorful abstract painting, a description asking for an abstract cubist painting showing human connection through geometric shapes and vibrant colors, the artist 'Artist: harsh', the status 'Status: Payment Completed', and the date 'Requested on 30-Oct-2025'.

The browser's taskbar at the bottom shows various pinned icons and the system clock indicating 19:49 on 25-11-2025.

The page allows users to submit custom artwork requests by entering details, selecting an artist, and uploading a reference image. A section on the right displays previously requested artworks along with their status.

10. User Shopping Cart Overview

The screenshot shows a web browser window with the URL localhost:44365/cart.aspx. The page has a header with links for 'Art gallery', 'Home', 'About Us', 'Terms', 'View Image', 'Wishlist', 'Art Request' (highlighted in red), 'Cart' (highlighted in red), 'Logout', and a greeting 'Hello Harsh Jariwala'. Below the header, there are two main sections: 'Your Cart' on the left and 'Order Summary' on the right.

Your Cart: This section shows a single item: 'Modern Art' by 'harsh'. The image is a colorful abstract painting. The price is listed as ₹9,000.00 (10.00% off) × 1, with a total of ₹9,000.00. There are quantity controls (minus, plus, and remove buttons).

Order Summary: This section provides a breakdown of the cart total:

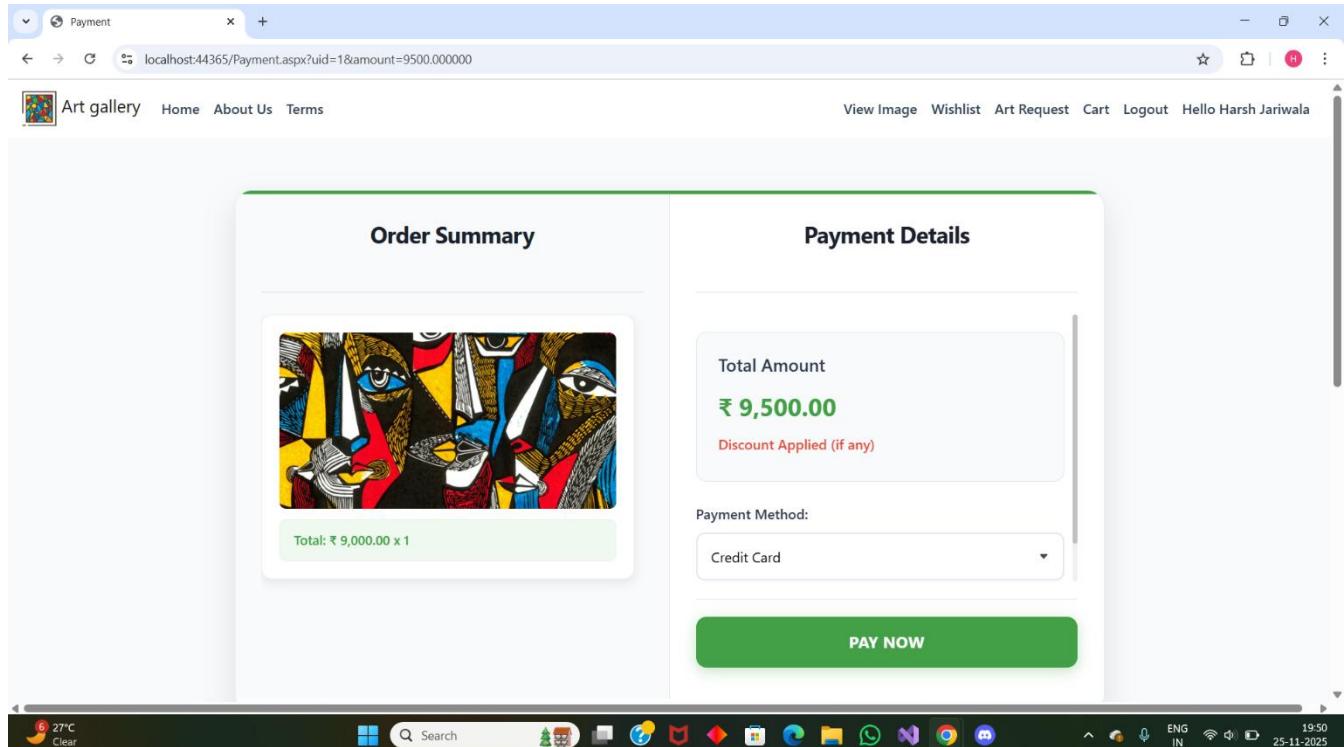

Subtotal	9,000.00
Shipping	50.00
Tax (5%)	450.00
Total	9,500.00

A red 'Proceed to Checkout' button is located at the bottom of the summary section.

The browser's taskbar at the bottom shows various pinned icons and the system clock indicating 19:50 on 25-11-2025.

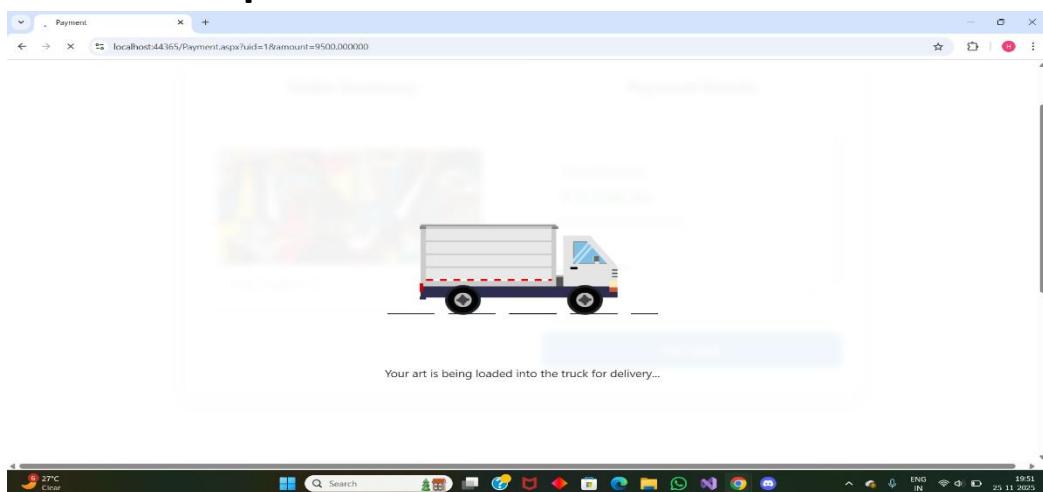

This screen shows items added to the cart with quantity controls, discount details, and an order summary. Users can review pricing, shipping, and tax before proceeding to checkout.

11. Secure Payment Checkout

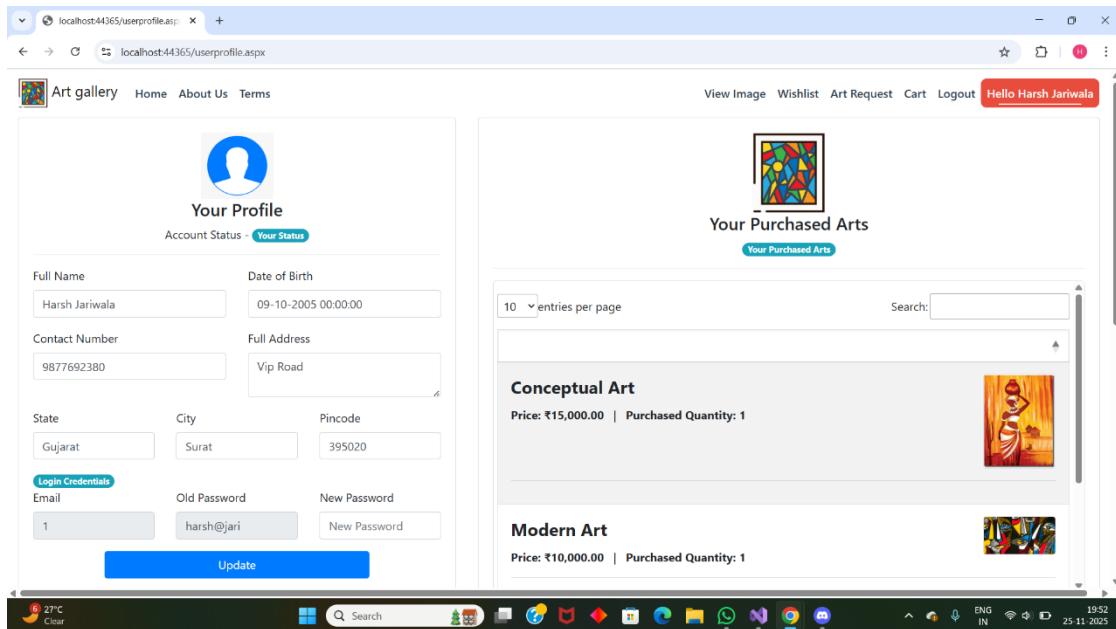

The payment page summarizes the selected artwork with the final amount payable. Users can choose their preferred payment method and complete the transaction using the “Pay Now” button.

12. Order Dispatch Animation

A delivery animation indicates that the purchased artwork is being prepared and loaded for shipment. It provides a smooth transition after successful payment.

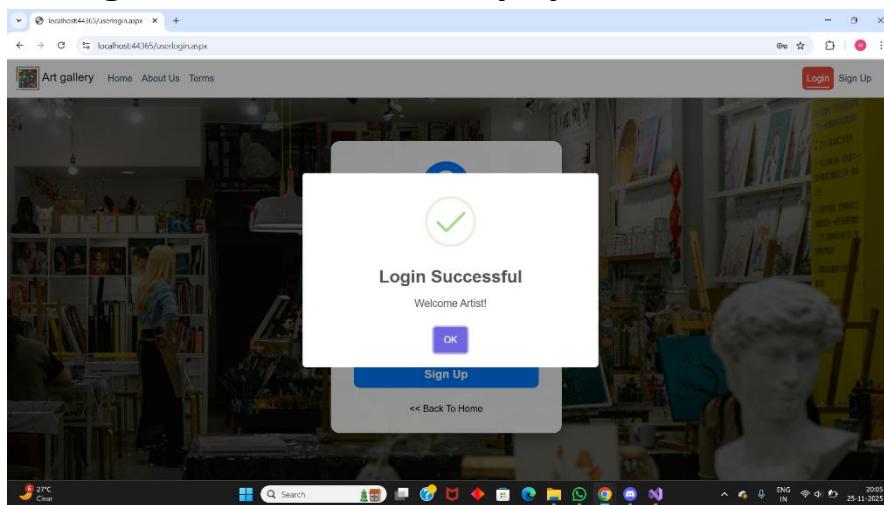

13. User Profile and Purchase History

This page displays detailed user information including contact, address, and login credentials. A dedicated section lists all purchased artworks with pricing and quantity details.

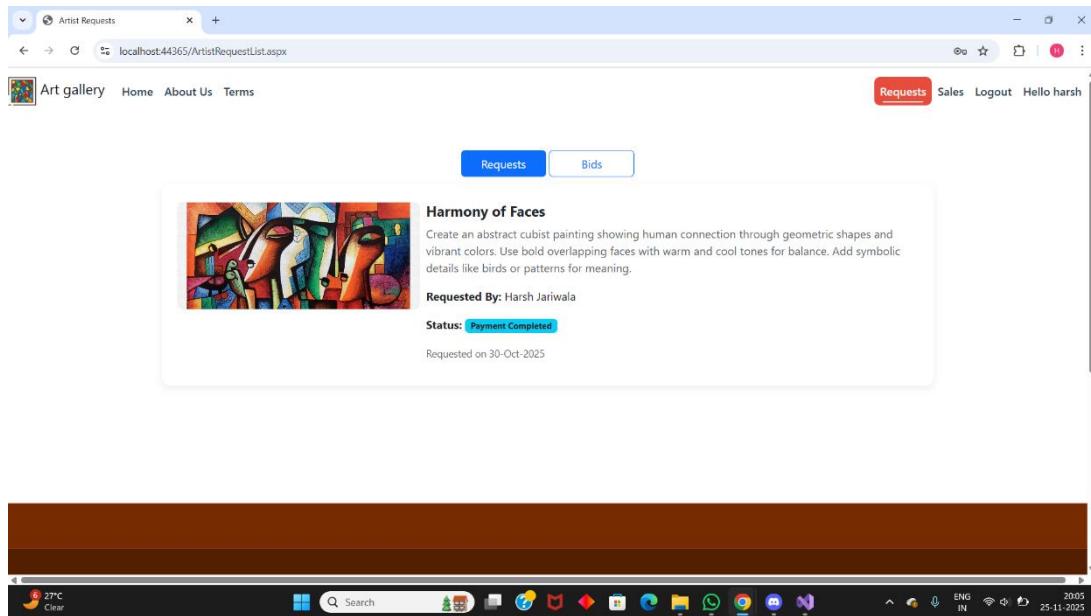

ArtistSide:

14. Login Confirmation Popup

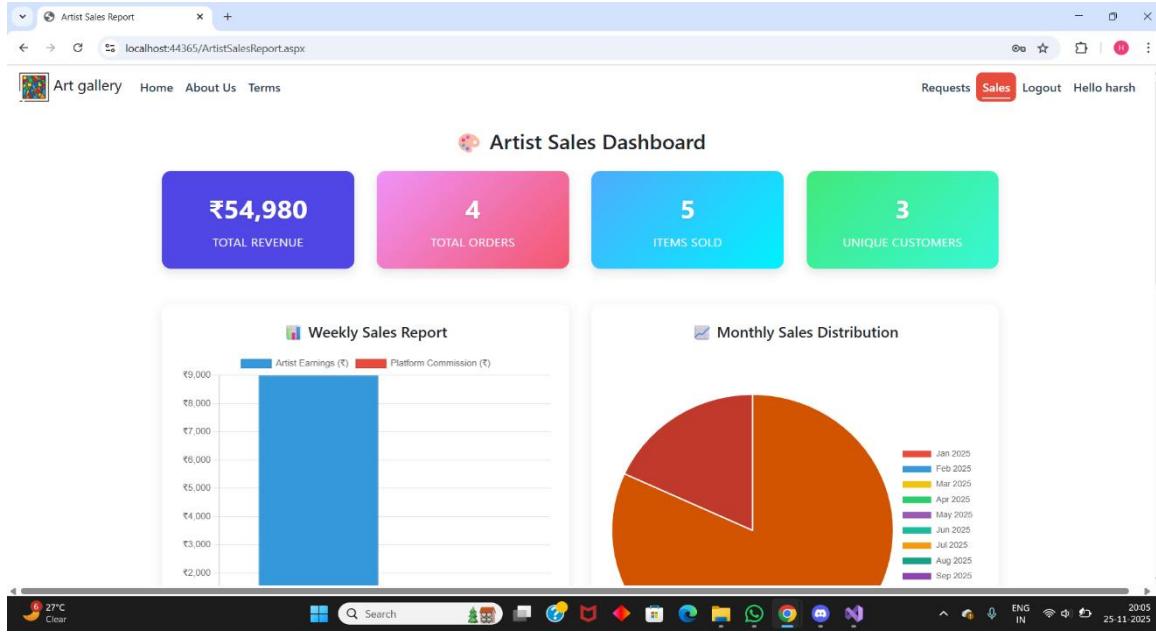

This popup appears after a successful login, confirming the user's authentication. It features a clean success icon, a welcome message, and a single "OK" button.

15. Artist Request Overview

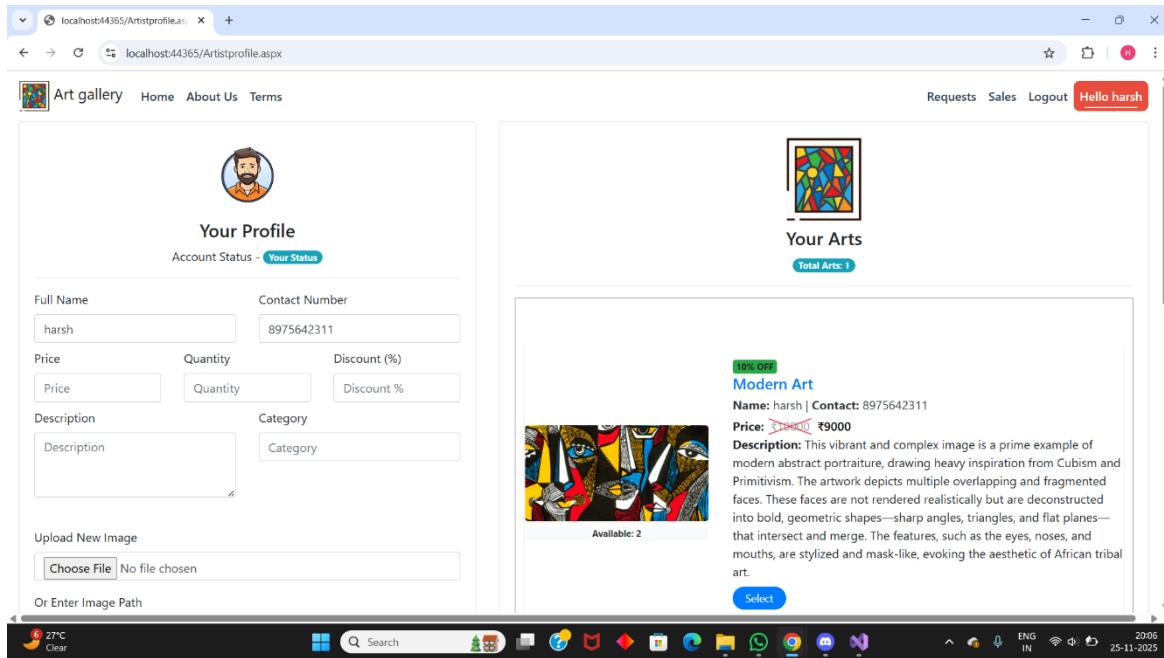

This page displays custom art requests received by the artist, along with artwork previews. Each request includes details such as title, description, requester name, and payment status. The clean layout helps artists easily track ongoing commissions and work priorities.

16. Artist Sales Analytics Dashboard

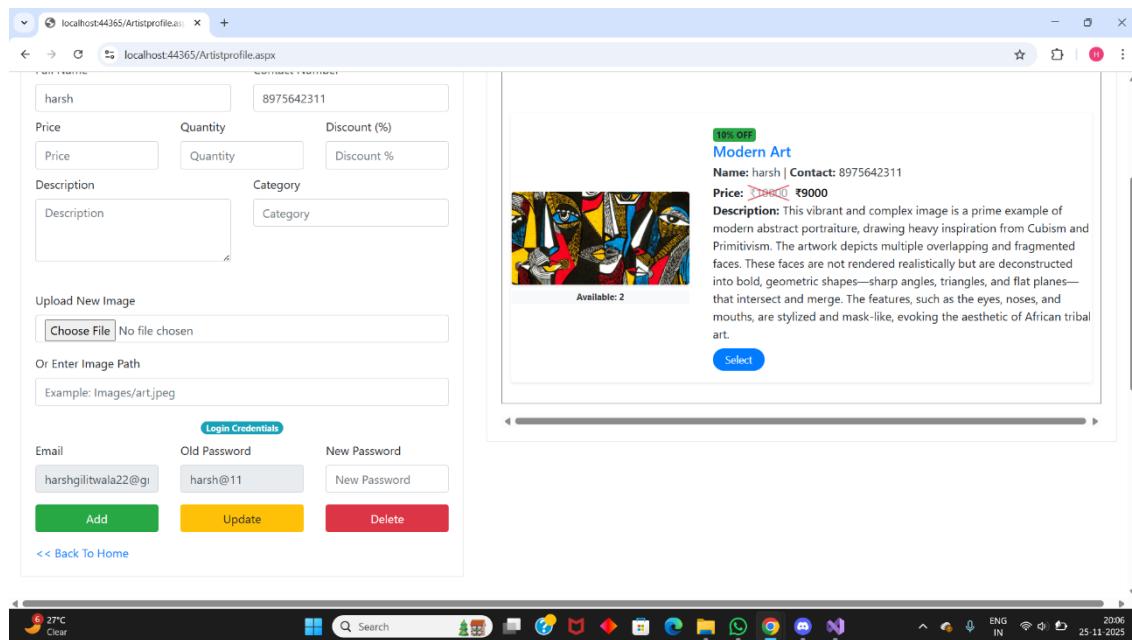

The dashboard provides a detailed summary of the artist's sales performance. It features metrics like total revenue, total orders, items sold, and customer count. Charts visualize weekly earnings and monthly distribution, helping artists analyze trends.

18. Artist Profile and Art Listing Panel

This screen allows the artist to manage personal details, artwork details, and uploaded images. The right section displays the artist's listed artworks with pricing, contact info, and discount badges. It enables easy editing, uploading, and managing of artwork inventory.

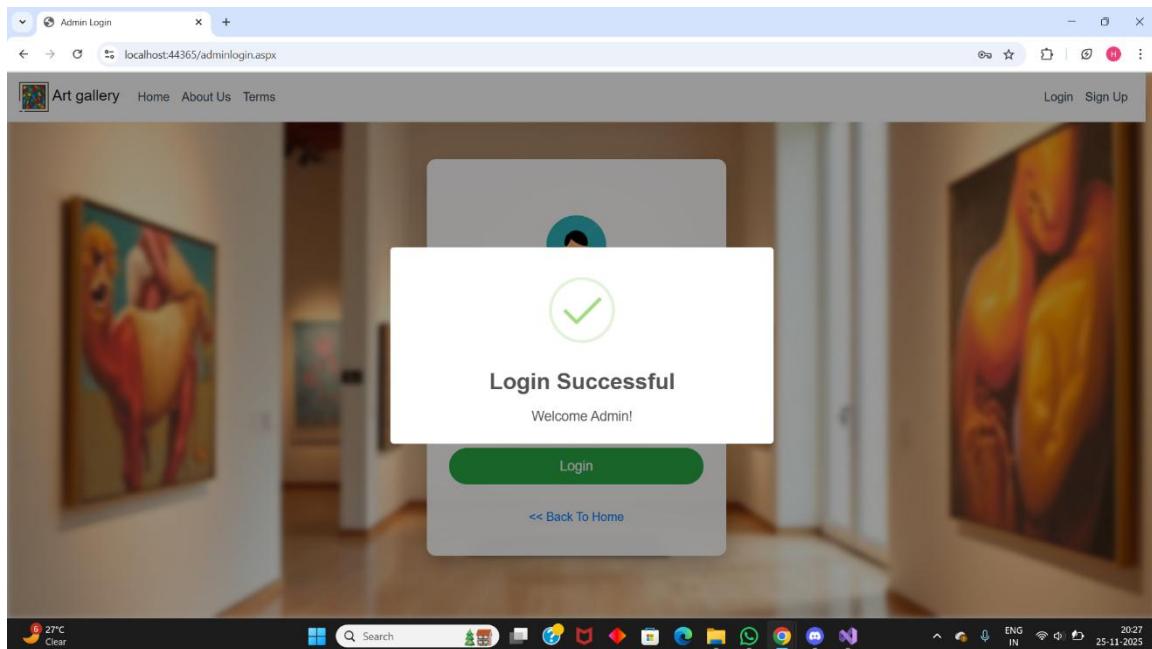

19. Artist Profile Editing & Login Management

This section provides options to upload new artwork images and update account details. Artists can add or edit artwork specs like price, quantity, and categories.

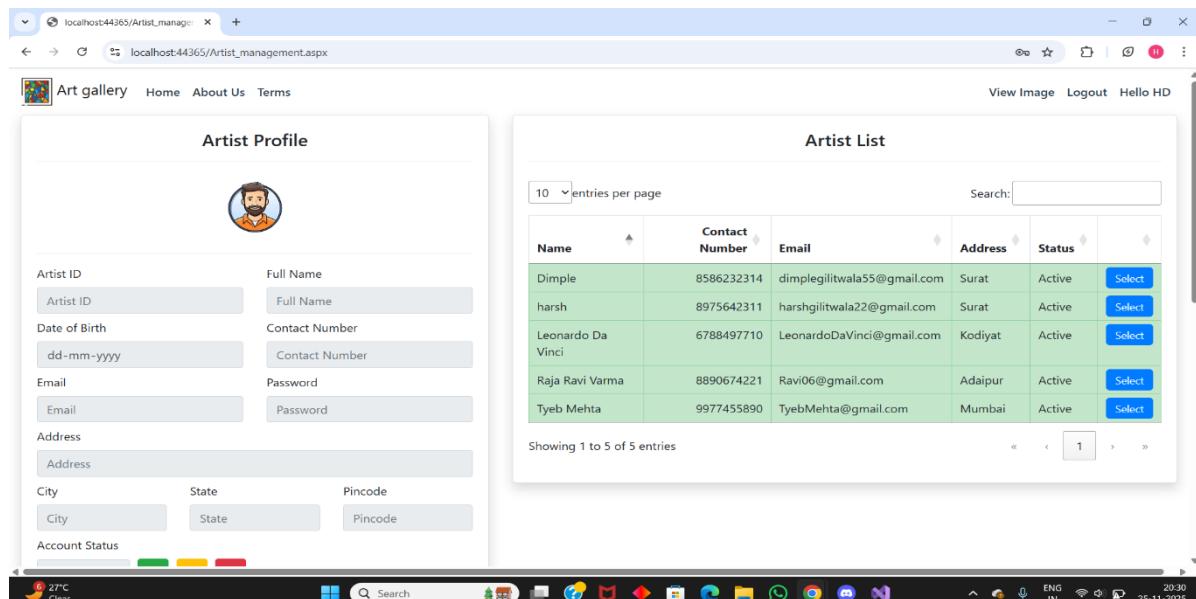

AdminSide:

20. Admin Login Confirmation

This screen displays a confirmation popup indicating a successful admin login. A clean white box with a green checkmark reassures the user that authentication was successful. The blurred art-gallery background maintains the website's aesthetic. A button allows the admin to return to the home page.

21. Artist Management Dashboard

Name	Contact Number	Email	Address	Status	
Dimple	8586232314	dimplegilitwala55@gmail.com	Surat	Active	Select
harsh	8975642311	harshgilitwala22@gmail.com	Surat	Active	Select
Leonardo Da Vinci	6788497710	LeonardoDaVinci@gmail.com	Kodiyat	Active	Select
Raja Ravi Varma	8890674221	Ravi06@gmail.com	Adaipur	Active	Select
Tyeb Mehta	9977455890	TyebMehta@gmail.com	Mumbai	Active	Select

This page provides an interface for managing artist records, featuring a detailed profile form on the left. Administrators can search, select, and edit artists from the table on the right. The clean layout helps staff efficiently manage artist details.

22. Artist Detail View and Status Update

The screenshot shows a web-based application for managing artists. On the left, the 'Artist Profile' section displays a placeholder profile picture of a man with a beard. Below it are input fields for 'Artist ID' (14), 'Full Name' (Leonardo Da Vinci), 'Date of Birth' (11-11-1977), 'Contact Number' (6788497710), 'Email' (LeonardoDaVinci@gmail.com), 'Password', 'Address' (Kodiyat), 'City' (Udaipur), 'State' (Rajasthan), and 'Pincode' (39905). On the right, the 'Artist List' section shows a table with five entries, each with a 'Select' button. The rows are color-coded: green (Dimple), yellow (harsh), pink (Leonardo Da Vinci), light blue (Raja Ravi Varma), and light green (Tyeb Mehta). The table includes columns for Name, Contact Number, Email, Address, and Status. A search bar and a page number indicator (1) are also present.

After selecting an artist from the list, all corresponding details are displayed in the profile section. The table highlights each artist's status with color-coded rows such as Active, Paused, and Disabled. This view allows administrators to modify the artist's information quickly. The intuitive interface helps streamline administrative workflows.

23. User Account Management Panel

The screenshot shows a web-based application for managing user accounts. On the left, the 'User Details' section displays a placeholder profile picture of a person. Below it are input fields for 'Full Name' (Harshit), 'Account Status' (Disabled), 'DOB' (2004-12-17), 'Contact No' (9977478090), 'Email' (harshit12@gmail.com), 'State' (Uttarpradesh), 'City' (Lucknow), and 'Pincode' (59002). There is also a 'Delete Artist Permanently' button. On the right, the 'User List' section shows a table with four entries, each with a 'Select' button. The rows are color-coded: green (Harsh Jariwala), yellow (Aryan Patel), pink (Harshit), and light green (Parmish Verma). The table includes columns for ID, Name, DOB, Number, Address, Email, State, City, and Pincode.

This section displays a selected user's complete profile including personal details, contact information, and address. Admins can update account status using interactive buttons or permanently delete the user.

24. Standard Artwork Orders Overview

The screenshot shows a web browser window titled 'Order List' with the URL 'localhost:44365/OrderList.aspx'. The page header includes 'ART gallery' and navigation links for 'Home', 'About Us', and 'Logout'. On the right, there are buttons for 'View Image', 'Logout', and 'Hello HD'. The main content area is titled 'Normal Orders' with a sub-section 'Conceptual Art'. It displays three items, each with a thumbnail image of a painting, the title 'Conceptual Art', the artist name 'Dimple', the user name, price '15000.00', and quantity '1'. The thumbnails show figures in traditional Indian attire. The bottom of the screen shows a Windows taskbar with various icons and system status.

This screen lists customers' normal purchase orders along with artwork thumbnails. Each entry includes the artwork name, artist, user, price, and quantity. The layout ensures quick review of all purchases at once. It allows admins to track customer activity and order flow efficiently.

25. Custom Artwork Order Summary

The screenshot shows a web browser window titled 'Order List' with the URL 'localhost:44365/OrderList.aspx'. The page header includes 'ART gallery' and navigation links for 'Home', 'About Us', and 'Logout'. On the right, there are buttons for 'View Image', 'Logout', and 'Hello HD'. The main content area is titled 'Custom Request Orders' and displays one item. The item details are: Title: Harmony of Faces, Description: Create an abstract cubist painting showing human connection through geometric shapes and vibrant colors. Use bold overlapping faces with warm and cool tones for balance. Add symbolic details like birds or patterns for meaning., Artist: harsh | User: Harsh Jariwala, Quoted Price: ₹ 15000.00 | Final Price: ₹ 15000.00, Status: Payment Completed | Payment: Paid, Remarks: Please give me this art fast as soon as possible., and Payment Date: 30 Oct 2025. An image preview of the abstract painting is shown on the right. The bottom of the screen shows a Windows taskbar with various icons and system status.

This page presents complete details of a custom art request submitted by a user. The order includes a title, description, artist, user, pricing, payment status, and special remarks. An image preview helps verify the requested concept. The interface provides clarity for managing custom commission workflows.

Implementation Details

Technology Stack:

Backend Technologies

- ASP.NET Web Forms 4.7.2 for server-side application logic
- C# for business logic implementation in code-behind files
- ADO.NET for database connectivity and operations
- SQL Server for relational database management
- IIS (Internet Information Services) for web server hosting

Frontend Technologies

- HTML5 for page structure and content
- CSS3 with Bootstrap 4 for responsive design and styling
- JavaScript for client-side validation and dynamic interactions
- AJAX for asynchronous data updates without page refresh

Development Tools

- Visual Studio 2019/2022 as integrated development environment
- SQL Server Management Studio for database design and management
- FileUpload control for handling artist profile and artwork images

Conclusion and Future Scope

Conclusion:

- The Online Art Gallery Management System provides a complete digital platform that connects artists and buyers through a secure, organized, and user-friendly interface.
- It solves the problem of limited online visibility for artists by offering easy artwork uploads, browsing, and purchasing features.
- Built with ASP.NET Web Forms and SQL Server, the system ensures stable performance, secure data storage, and proper role-based access control.
- Core functions like artist approval, artwork management, shopping cart operations, order processing, and sales reporting work correctly and maintain transaction accuracy.
- The system offers smooth navigation and intuitive interfaces for admins, artists, and users, making it a practical solution for online art commerce.

Future Scope:

- Integrate real payment gateways (Razorpay, PayPal, Stripe) and add powerful search filters to improve transactions and artwork discovery.
- Introduce rating & review systems, social media sharing, and wishlist features to increase user engagement and trust.
- Add an auction feature for bidding on unique artworks, and implement a messaging system for direct artist-buyer communication.
- Develop Android/iOS mobile applications enabling users to browse, purchase, and manage artwork from anywhere.
- Enhance analytics dashboards and add print-on-demand services to provide better insights and additional revenue opportunities for artists.
